Downloaded from Myrrh, the Moore College Institutional Repository
Frank Cash photograph collection
Rev. Dr E.F.N. (Frank) Cash was the rector of Christ Church Lavender Bay and a keen amateur photographer. He was the only amateur photographer to be permitted onto the construction site of the Sydney Harbour Bridge, and took photographs throughout the building process. His photographs also include images of his family: his wife Elizabeth, son John who joined the RAAF and was killed in action in 1941, and three daughters Mary, Miriam and Elizabeth. He also took many pictures of trees, native animals and rock formations, particularly around the Glen Innes area and inside Jenolan Caves. There are also a small number of photos of the Fairbridge Farm School for child migrants in Molong, WA.

This list includes the positive images held in the collection, the majority of which are glass lantern slides, with a small collection of paper prints. Descriptions of the glass slides have been transcribed from Rev Cash’s inscriptions on the paper borders of the slides. A large number of the slides are copies of paintings and illustrations from books, as well as hymn lyrics.

Rev. Cash’s cameras, lantern slide projector and enlarging device are also in the custody of the Samuel Marsden Archives. One of the cameras is currently on display inside the south pylon of the Bridge.

Box 1:
Letter of permission from Dornan, Long & Co. to take photographs
Leather wallet, 10x6cm, with initials F.C. and dated 3/9/24
Order of service and transcript of Governor-General’s address at the opening of the Cash memorial chapel, Moore College 20th November 1950, pamphlet describing the memorial vessels.
Newsclippings
Lists of lantern slides for Old and New Testament series
Pamphlets relating to the Harbour Bridge, several issues of Christ Church Lavender Bay Parish Paper, thankyou card from Annie W. Cash following Frank Cash’s death.

Parables of the Sydney Harbour Bridge

Box 2:
Collected books and pamphlets relating to photographic processes
Notebook recording exposures of negatives

Positive prints – black and white
Folder 1, Box 5:
Opening of the John Francis Cash memorial Chapel, Moore College 1950 26x20cm
John Francis Cash memorial plaque – 3 copies, 22x16cm

St Andrew’s Cathedral 26x20cm

Christ Church Lavender Bay, with Rectory 26x20cm

Bishop Muncey, Bishop Baker, Dr Felix [Cerust?], Canon Nelson, Bishop Bergamin, Rev Broughton Knox, Rev John Stall, Dr Cash, Rev Cassidy, Dr Robinson, Archdeacon T.C. Hammond, Bishop de Witt Batty, Fr. Basil Eddie, Bishop Pelder, 1950s, 22x17cm.

Moore College Faculty with Principal D.J. Davies, 1913 26x20cm

Three clergymen, 1950s? 26x20cm

Two men, one in academic robes, 1950s? 26x20cm

Crowd gathered among trees, view from behind. Many people are standing on top of a fence rail and on stools. 3 copies, 23x16cm

Fairbridge Farm School, Molong, WA:

1. Boys building a haystack
2. Wagon of hay pulled by six horses
3. Loading hay from wagon onto haystack
4. House behind tall gum tree
5. View of buildings between two trees
6. [not located]
7. Two boys removing bread from brick oven
8. Four boys with teacher in classroom with diagram of tree rings on blackboard
9. Boy feeding pigs
10. Front of main building (2 copies)
11. Boy hammering nails into sole of boot
12. Group portrait of children
13. Two boys holding carcass of pig
14. Two men in wheat field with harvester
15. Girl ironing
16. Two men and boy with haystack and ladder
17. Two men driving tractor through wheat field
18. Paddock with sheep under gum tree
19. Group of children on dirt road
20. Boys in workshop
21. Two residential buildings
22. Paddocks and hills with wire fence and gate in foreground
23. View of hills with lake and trees
24. Girl in camp bed
25. Boy with bell
Sydney Harbour Bridge – view towards south side from next to north side – arch partially completed on each side 16x12cm

Sydney Harbour Bridge – view from Christ Church towards north side, with creeper crane 16x12cm

Looking up the arch towards creeper cranes – 2 copies – 26x21cm

Joint between cables and arch – 3 copies – 22x17cm

Two sides of arch almost joined, view from base of pylon – 21x17cm

End of unfinished decking from inside arch, from side angle – 2 copies – 26x20cm

End of unfinished decking from inside arch, straight on – 3 copies – 22x17cm

Steel girder with half cylindrical hole – 22x17cm

Workman with steel cylinder suspended by ropes – 30x17cm

View from Rectory of both sides of unfinished arch with creeper cranes – 5 copies – 22x17cm

View from Rectory of both sides of arch meeting in the centre, with creeper cranes – 26x21cm

View from Rectory of arch with 1 panel of decking – 2 copies – 26x21cm

View from Rectory of arch with 6 panels of decking – 26x21cm

Close-up of centre of arch with first panel of decking being lowered – 22x17cm

View from Rectory of completed bridge – 22x17cm

Frank Cash being presented with book “Sixteen turning points in the construction of the Sydney Harbour Bridge – 25x20cm

Square link pin – 30x8cm and 2 smaller copies

Diagram of cross section of deck and hangers – 24x8cm

Commemorative scissors – 3 copies – 22x8cm

Golden candlesticks for Cash Chapel – 22x17cm

Box 3:

Lord Howe Island – 29 black and white prints with accompanying notes in folder

Birds and birds’ nests – b/w prints in folder

Landscapes and rock formations – b/w prints in box

Western Australia – includes farms and farm workers, camels and horses, landscapes, machinery and mining, Indigenous people. Approx. 50 b/w prints.

Box 4:
Enlargements of bridge photos

Enlargements of Shore school photos – 36x30cm

Interior of Cash chapel – 2 copies – 36x30cm

Exterior of Cash chapel with woman in doorway- 36x30cm

Cash chapel memorial stone – 36x30cm

Portrait of John Cash – 36x30cm

St Andrews Cathedral and Great Bible of 1539

Copy of group portrait of gathering of bishops

Wildlife, landscape and rock formation photos

Lavender Bay with ferry - 1880s? 21x16cm print on mount – corners damaged and significant foxing

Box 5:

Two albums (35x26cm) containing b/w prints under tissue paper of the construction of the Sydney Harbour Bridge

Box 6: Sydney Harbour Bridge workshops and demolition of houses in Milson’s Point – approx. 200 b/w prints, 11x8.5cm

Box 7: Sydney Harbour Bridge construction of arch and views from base of pylon – approx. 30 b/w prints – 17x12cm

Box 8: Family portraits and Jenolan Caves – approx. 50 prints, 11x8.5cm

Box 9: Globes, lenses, parts for cameras.

Realia: Enlarging device, lantern slide projector, camera in brown case.

Glass lantern slides – black and white positive. The later date refers to when the slide was produced from the negative.

Box 1: Sydney Harbour Bridge

3. The two highest granite pillars, 85 feet. Fourth approach span on north side. 28th Jan 1968.
4. Ferries from top of end post on south. Ferries in the harbour from top of end frame and portal. Middle of 1929. Varnished, dyed with methylene blue, 25th May 1944.
5. Twin wharf cranes, on Wed afternoon 19th July 1929, two travelling wharf cranes at Milson’s Point and 4th panel of arch on. 30th Jan 1962.

7. Identity disc attached to a cable, giving length, no. of wires, weight, shipping no., circumference. 7th Feb 1962

8. Creeper crane in the clouds: the creeper crane near the crown of the arch. 22 Jan 1962. Glass cracked across top right corner.

9. Releasing the cables: diagram. A diagram showing the method of releasing the cables at the link plates. 22nd Jan 1962.

10. The second panel in course of erection, Feb 1929. Creeper on top of first panel is building the second slide. 22.1.62.

11. Centre saddle: south side. The 10 inch square tapped pilot pin in south side of arch of bridge, ready to be driven home into squared on north side, and showing the 2-8 inch bearing pins in the massive steel saddle. Photo in workshops on Sat 2nd Aug 1930. Ilford Lantern slide meth blue, 19th Feb 1962.

12. Centre saddle, north side. Joining of bottom chord. The heavy forged steel saddle of north arm. The squared 10-inch pin hole which will take the pin 7ft 3 ¾ in. long in the south arm. Half a pin hole belongs to each member. Photo in workshops on Sat 2nd Aug 1930. Ilford lan meth blue, 19th Feb 1962.

13. North arch creeper on 8th panel. Main arch on north side, creeper on 8th panel erecting 9th panel. See link plates at top of end post. Photo from near workshops on Tues 13th May 1930. Ilford lanmeth iron toned 12th Jan 1962.

14. Template for the skewback. The S. receives the thrust of the main arch span after the thrust has been transmitted thro. the main bearing. Slide 22.1.62.

15. Varnished: gap in the top chord before jacking operations in Sep 1930. Toned with 25% iron, 75% uranium on 28 June 1945. Very still day, terrie exposure on half plate, 450 feet up.

16. Second panel of arch on south side. The creeper on the first panel has almost completed the second panel. Ilford lantern varnished tones Fe25, Ur75 on 26th June 1962.

17. Main arch on south, 7 panels, end of December 1929. Neg on ½ pl. with 3 power Ross Teleros from Ch.Ch.Rec. Ilford lantern varnished tones Fe25, Ur75 on 16th June 1962.

18. Jacking operations in the top chord. Joining of top chord on providential day, 8 Sep 1930. Hoisting hydraulic jack of 1000 tons pressure to place in gap, 450 feet above harbour. The gap is 24 ins. Screw jacks and hydraulic jacks exert a pressure of 3,428 tons. The final machined keys were then fitted into place. Varnished 28th June 1945.

20. Outside curve of north approach spans. The fifth span to the pylons is out of sight to the left. 7th Feb 1962.

21. Twelve panels of main arch on south side on 14th July 1930. All the 128 cables are tensioned. 28th June 1945.
22. Bridge from the bottom of Alfred Street soon after completion in March 1932. 29th Jan 1962.
23. Excavation for skewback on north side. 40 feet deep, aggregate floated to top of bucket. 2nd Feb 1962.
24. Joining of top chord on providential day, 8 Sep 1930. Mr L. Ennis, Director. Hoisting hydraulic jack of 1000 tons pressure to place in gap, 450 feet above harbour. The gap is 24 ins. Screw jacks and hydraulic jacks exert a pressure of 3,428 tons. The final machined keys were then fitted into place. Varnished 28th June 1945.
25. Jacks in position in gap on top chord. Copy from a print given to Dr Frank Cash by Mr Lawrence Ennis the director. Sat 6th Jan 1962.
28. A photograph of the bridge in Oct 1944 from Christ Church Rectory. 7th Feb 1962.
29. Dawn from Christ Church Rectory on a February morning 1937 at 4:30am. Reflection of bridge lamps. Kodak white label iron toned and varnished 2nd May 1944.
30. The bridge scissors for cutting the ribbon on the opening day. Slide 6th June 1944, Kodak white label.
31. Bridge Oct 1944 from Christ Church Rectory. 15th Feb 1962. (Glass cracked)
33. Detail of first hanger with its cradle at noon Thurs 25th Sep 1930. Hanger 192 feet long, weighs 37 tons. Detail from whole plate neg from Christ Church rectory on that day. Slide made 12th Jan 1962. Ilford varnished, iron toned.
34. Looking through the steel work of the main arch at deck level July 1930 at 12 panels out. Varnished, iron toned 1st Aug 1944.
35. Western footway on Sydney side in 1928. We are looking towards Sydney. 30th Jan 1962.
36. Dawn reflections Friday 29 Jan 1937 at 4:30 am. Kodak white label 10th June 1945.
37. One of the four main bearings of bridge, weighs 296 tons. Neg 1929, slide 28th May 1944.
38. Erecting first section of the bottom chord on west of the north side on 23rd July 1929. (Glass cracked across top left corner)
39. Dawn from Christ Church Rectory Feb 1937, 4:15 am. The hangers in the reflection are fading out as daylight comes on. From ½ pl. negative. Slide Kodak white label on 5th June 1944.
40. Main arch, 8th June 1930. Ilford lantern varnished 12th Jan 1962.
41. Testing bridge lamps Feb 1932. Six minutes exposure for lamps. All lamps not lit at same time – cap lens. When lamps out ½ hour exposure for bridge and travel of ferries to McMahon’s Point and Lavender Bay on right, Milsons Pt on left. Varnished, iron toned 25th May 1944.
42. The bridge rivets. Five million used in the fabrication of the structure. Heaviest up to 6 ½ lbs. Longest 16 inches, heated red hot. Ilford lantern 28th Jan 1962.
43. Look out from St Xavier’s Hall 1938. 29th April 1944.
44. Main arch, 19th May 1930. Ilford lantern varnished 12th Jan 1962.
46. 1922 – the lookout across the harbour from Christ Church Rectory. A penny ferry is coming to McMahon’s point then on to the wharf at the foot of Lavender Bay steps. 2nd Feb 1962. (Glass cracked down right side and top right corner)
47. Joining of the bottom chord of bridge on Wed morning 20 Aug 1930. Slide on 24th Nov 1943.
48. The decking and hangers of bridge in course of erection. Dec 1930. Negative on whole plate from bottom lateral bracing with 6 ½ inch lens. White label Kodak.
49. Joining of top chord, 8th Sep 1930. Creeper crane hoisting hydraulic jack into gap of 24 inches. Mr Lawrence Ennis, the director looking on. Slide on 25th Feb 1944.
50. The creeper erecting the two end posts in Jan 1929. Slide on 22.1.62.
51. Creeper crane on top of first panel on north side. Sep 1929. 28th June 1945.
52. Second panel of arch, south side.
53. 2 panels on north, 7 on south on 13th December 1929. Main arch, ½ pl. negative from Christ Church Rectory. 16th Jan 1962.
57. First two hangers and first cross girder on 27th Sep 1930. 28th June 1945.
58. decking of the bridge.
59. The decking and hangers of the bridge in course of erection. From the deck level, negative on whole plate with 6 ½ inch lens, Dec 1930. 6th Aug 1944.
60. The opening day 19th Mar 1932, from Christ Church Rectory. 15th Feb 1962.
61. Dawn from Christ Church Rectory February 1937 4:15 am. 10th June 1945.
62. Dawn of the New Year 1st Jan 1935 at 3:57am. The full and perfect reflection is very rare. Kodak blue label, varnished, dyed methylene blue, 25 May 1944.

Box 2: Sydney Harbour Bridge

3. Bridge lights & ferry tracks. Before bridge was opened – trying out bridge lights 12th Feb 1932 8:30 to 10pm. Silvery tracks are tracks of ferries to McMahon’s Point and Milsons Point from Quay.
4. Fixing bearing top granite pillar
5. Erecting the jib of creeper crane on the ramp on the north side 1929.
6. The horseshoe hydraulic riveter
7. Granite pillar of approach span 1926
8. Joining of bottom chord – bottom chord in position nearly for locking on 20th Aug 1930
9. Squared hole for pilot pin
10. Pilot pin – centre bearers of bottom chord
11. Erecting creeper crane, N. Side
12. Erecting creeper crane on south side Nov 1928
13. First section in two pieces of bottom chord of first panel north side 23rd July 1929
14. Centre of bottom chord Aug 1930
15. Erecting footway brackets to approach spans on N. Side. Photo from top of pillar.
16. Looking from south to north side
17. Top lateral bracing from the jib of the creeper crane
18. Beginning approach spans – south
19. Cables in store for arch – cables for anchoring main arch
20. Granite pillars for south approach spans
21. Curve of approach spans, north side
22. Troughings of deck, approach spans and western railway on south side
23. Scene from north side March 1929
24. Erecting first section, bottom chord – first section of bottom chord on north side being set on the main bearing.
25. Progress of arch, April 1929
26. The pilot pin – the powerful tapered pilot pin that locked the bottom chord
27. Bridge decking from deck – the deck and hangers of the bridge in course of erection from deck level. Negative on a whole plate with 6 ½ in lens in December 1930. Ilford special lantern plate on 26th Oct 1943.
28. Erecting approach spans, north side
29. Bridge rivets
30. The two highest concrete pillars, faced with granite, being 85 feet in height, of the fourth approach span on the north side. 24th Nov 1943.
31. Steel shavings from plane
32. Creeper on ramp, December 1928
33. Lookout from Rectory, June 1929
34. Record day, 26th November 1929, 578 tons erected.
35. Approach spans, 1st panel, south side
36. Joining of the bottom chord, Aug 1930
37. The bridge from Rectory at 12:15am Aug 1935
38. Joining of the top chord of the bridge on the providential day, 8th Sep 1931. Mr L. Ennis, director, is looking on at the work, 450 feet above the harbour. Slide on 24th Nov 1943.
40. Harbour bridge in the rain, 9th Feb 1935
41. Aggregate for erection of screwbacks on north side
42. Link plates with some cables attached
43. Erecting south eastern bearing
44. Fourth falsework and last two pillars of approach spans on north side
45. One of the centre bearings of the bottom chord of main arch
46. Creeper cranes with flags on 20 Aug ’30, to celebrate joining of bottom chord
47. Jib of the creeper crane
48. Creeper crane and part of undercarriage on top chord of the harbour bridge. Neg 1930, toned slide 15 Nov 1943
49. First panel in erection, south side
50. Link plates, part of end frame and portal
51. First approach span on south, early 1927
52. Erecting creeper on ramp, south side, October 1928
53. Progress of half arch on south
54. Section of bottom chord
55. Workshops in Lavender Bay
56. Top chord on South Side, November 1929
57. Creeper on first panel, just off ramp
58. Last piece of bottom chord being hoisted
59. Pin to pin link plates to end post
60. Hoisting member for approach span
61. Joining of bottom chord of arch, 20th August 1930
62. First approach span, south side
63. Timber towers – cranes – jib of 110 feet on foreshore for erecting pylons
64. Timber towers on north side
65. Timber towers on north side of the harbour, which built the skewbacks and then built up the pylons to 155 feet deck level.
66. Bridge at night from Christ Church Rectory 1932. Kodak white label toned and varnished 3rd May 1944

Box 3: Sydney Harbour Bridge

1. Centre steel saddle – the joining of the bottom chord of the bridge. The heavy forged steel saddle of the northern arm. The squared pin hole 10ins square, which will take the pin, 7ft, 3 ¾ in long in the southern arm. Pin is 10ins sq. Half a pin hole belongs to each member. Photo in the workshops on Sat 2nd Aug 1930. Ilford lantern varnished slide on Sat 6th Jan 1962.
2. Pilot pin in centre saddle. The 10in square tapered pilot pin in south side of the arch of bridge, ready to be driven home into the squared socket on the north side and showing the two 8 inch bearing pins in the massive steel saddle. Photograph made in the workshops Sat 2nd Aug 1930. Slide: Ilford lantern plate Sat 6th Jan 1962.
3. Cage going up from barge. Two men or three in a cage, being hoisted by the creeper crane from a barge in the fairway to their place of work, somewhere on the arch. The height from water to top or crown of arch is 437 feet. Slide on 3rd Feb 1944.
4. Milson’s Point railway, soon after bridge was opened on 19th March 1932. Note Milson’s Point wharf on right, and Dorman Long’s office of the workshops still standing on the site of workshops. Slide 3rd Feb 1944.
5. Detail of link plates, showing the 8 link pins and 8 rows of cables, each row of 16 and the sockets by which the cables are attached by the threaded link pins. The link plates were pinned to the top of the end post by a 27-inch diameter pin. The cables supported the main arch, each half of 14000 tons during erection. 4th Dec 1943.
6. Hoisting bottom boom of the third approach span on north side. Note the bearing to fit bearing pin set in top of the granite pillar. All the four approach spans move on these pins. Negative 1928, slide on 27th Feb 1944.
8. Bridge beginnings on south side
9. First hanger of the bridge with its cradle. Noon on Thurs 25 Sep 1930. Hanger is 192 feet in length and weighs 37 tons. Detail from whole plate neg made from Christ Church Rectory. Slide on 3rd Nov 1943.
10. Erecting 2nd panel, south side.
11. Erection end frame, south side
13. The ship Maconoi passing under bridge about January 1932, a few weeks before the pylons were finished. The lookout is through the end of the workshops near north pylons. Slide 3rd Feb 1944.
14. Creeper crane on top chord, 1930. The main hoist and jigger are in front out of sight. The two picturesque jibs are on rear of creeper and are only 2 1/2 ton load. Slide 25th Feb 1944.
16. Smoke from seven ton crane. One of the seven ton cranes that worked on the erecting of the wood falsework in the building of the four approach spans on Sydney side. Poised on the edge of the approach spans, with full steam, the sight was picturesque. Varnished, dyed with methylene blue, 13th Aug 1944.
17. Four single line tunnels, beneath St Peter’s Church and Church of England Grammar School. Site of North Sydney station. Kodak white label.
18. Falsework and last two pillars, north side 85 feet high. The falsework was a temporary wooden structure for carrying cranes for building steel approach spans and pillars. Negative 3rd Jan 1927. Wood in this span is 1400 tons. Varnished, uranium toned, 13th August 1944.
19. Skewback, to take main bearing
20. Four panels on south side from the punt.
21. Twelve panels of main arch on south side on 14th July 1930. All the cables are tensioned. Timber towers are building the pylons up to 285 feet. The half arch still 120 feet from meeting point. Varnished, uranium toned 1st Aug 1944.
22. Four panels on Sydney side.
23. Link plates, cables and sockets.
24. Creeper hoisting piece of panel post.
25. Timber towers for erecting pylons, 1926.
26. Approach spans, south, from crane
27. Benalla putting off after discharging steel at workshops in Lavender Bay.
28. The vehicular punt at Jeffrey St.
29. Gap in top chord, Sep 1930.
31. Bottom chord joined – joining of bottom chord of bridge. The bottom chords were locked together, the 4 centre bearing pins were fitted into centre bearings, and the two pilot pins thrust home in the early morning hours of Wed 20th Aug 1930. The flags unfurling at 8:40am blew out the message that the great arch was locked forever. Photo from Christ Church Rectory Sun 24th Aug 1930. Kodak white label.
32. First hanger and creeper cranes – first hanger of the bridge with its cradle, noon on Thursday 25th Sep 1930. Hanger is 192 feet in length and weighs 37 tons. Detail from whole plate neg made from Christ Church Rectory. Ilford varnished 12th Jan 1962.
33. Main arch from pillar, 12 panels finished. Neg on whole plate from top of granite pillar of 1st approach span, thus giving unusual perspective to footway above, and top chord, July 1930.
34. Decking in construction
35. The main arch of the bridge on 14th July 1930. Distance separating two halves is 240 feet. Negative on whole Kodak Austral from Christ Church Rectory. Slide Ilford special lantern 20th Nov 1943.
37. Detail of the joining of the top chord of bridge on 8th Sep 1931. Negative made from the western chord. Two screw jacks are in position in the 24in gap. A great hydraulic jack is by Lawrence, the surveyor on the right, and Charlie Hipwell, construction engineer is measuring on the left. Centre panel post of 60 feet below. Slide on 24th Nov 1943.
38. First two hangers and first cross girder of bridge on 27th Sep 1930. Negative whole plate Austral from Christ Church Rectory. Ilford special lantern.
39. The first panel of the main arch of the bridge in March 1929. Creeper crane has moved from pylons on to the top chord. Cables hanging down in right corner of pylons. Slide on 20th Nov 1943.
41. The opening day of the bridge, 19th March 1932. The steel frame of workshops still remaining, but being disassembled. Milson’s Point ferry left. Ferricyanide toned slide, 25th Feb 1944.
42. Bridge reflections, Monday 1st February 1937, 4:35am. Slide from ½ plate negative on 10th Dec 1943. The lookout from Christ Church Rectory.
43. The creeper crane on Sydney side erecting 2nd piece of 1st section of second panel of main arch. Note the gap as it is being hoisted by creeper into place. See the cables in right corner of pylons not yet attached to link plates at top of the end post for supporting main arch in its progress across water. Toned slide 15th Nov 1943.
44. 8 panels of arch on north side
45. Hoisting a piece of panel post from barge in the stream, Tues. 26th Nov 1929. Record day in arch bridge structure, 578 tons being placed in position. Slide from ½ plate on 12th Nov 1943.

46. Creeper crane on top chord of harbour bridge, with the 2¾ tons derrick-crane on back carriage of the creeper. Men at work on top chord. Top lateral bracing on right of creeper. Negative N.C. film 1930. Sulphide toned slide on 29th April 1939.

47. Approach spans to second panel, south side.

48. No. 3 socketing operations

49. No. 2 socketing operations

50. Progress of main arch

51. The bridge on a rainy day 9th Feb 1935 3:15pm.

52. Diagram of anchorage system

53. First section of bottom chord, south side

54. End frame and first sections of bottom chord

56. The link plates on north east showing the 8 link pins and 8 rows of cables of 16 each, and the sockets by which the cables are attached by the threaded link pins. Slide 6th June 1944, varnished, iron toned.

57. Eight panels from Christ Church Rectory

58. Looking along panel system from deck level on Sydney side, September 1929. Western footway brackets are cantilevered out. Creeper crane on top chord. Slide on 25th Feb 1944.

59. First two hangers and first cross girder of the bridge on 27th Sep 1930. Each centre hanger is 192 feet in length and weighs 37 tons. Cross girder 160 feet in length, weighs 98 tons. Slide 3rd Nov 1943.

61. No. 4 socketing operations

62. No. 1 socketing operations
